

I-ECLIPSE

THE ADVENTURE GOES WITH YOU!

It features exceptional stiffness and the same maneuverability as the traditional model, but at a much lower weight and in a portable format. iEclipse features an extensive stand-up platform covered with EVA padding, ensuring great stability even in wind, waves and currents. The new and improved hull design reduces weight while increasing durability.

Its high-tech nylon ripstop construction allows for inflation pressure of up to 10 PSI / 0.70 kg/cm², giving it the same robustness and maneuverability as the original Eclipse model, in a much lighter and easier to carry format. Thanks to the MirageDrive GT pedal propulsion system, every step on the iEclipse board propels you with minimal effort. The steering system is integrated into the handlebars and the board, and operation is as simple and intuitive as using the lever with your hand to turn the board to the desired direction. And like the other Mirage inflatable models, the iEclipse is easy to set up and transport. Load it in your car or RV, or check it in on your next trip.

CHARACTERISTICS

- iECLIPSE
- MirageDrive: GT
- Length: 3.35 m / 11'
- Width: 1.02 m / 40"
- Capacity: 136 kg / 300 lbs
- Weight without accessories: 12.7 kg / 28 lbs
- Weight with accessories: 18.1 kg / 40 lbs
